on

# COVID-19

**Coronavirus!**

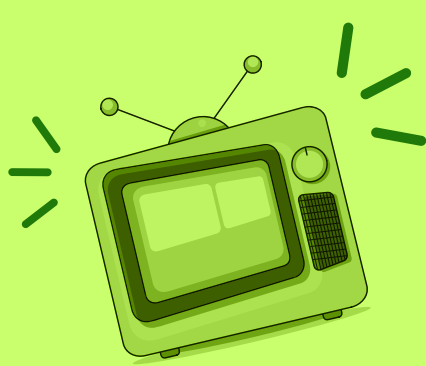

What is COVID-19  
coronavirus?

Coronavirus is a type of virus that causes illness. Viruses are very small organisms that none of us can see. They can make people sick by easily entering their bodies because they are so tiny.

Corona is a latin word which means crown. Under a microscope the virus looks like a crown having spikes that end in little balls. A new variant of coronavirus appeared in the year 2019, which was not known to anyone earlier and hence it is called "COVID- 19".

# Why is everyone talking about it on TV, at home, in school?

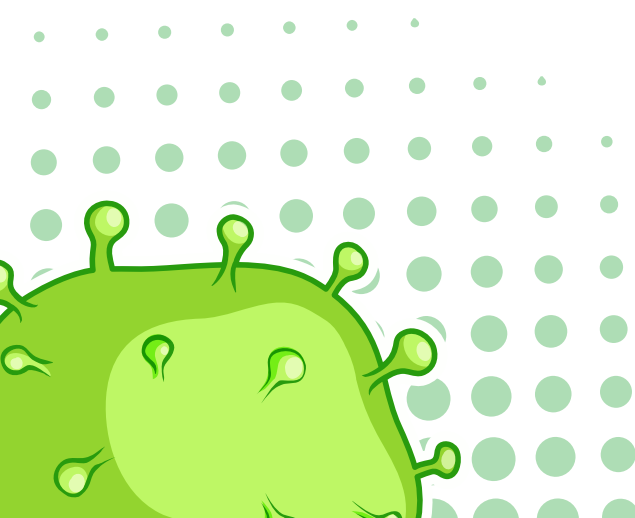

It is popular since it is new & it has affected the health of a lot of people in some parts of the world...

But now, most of the people won't get sick with it since they are taking proper care.

It may spread from a sick person to the ones who are not only if precautions are not taken.

Hence, people learn and teach each other how this virus travels from one person to others and what can be done to stop its spread.

That's the reason why everyone is talking about it.

A girl with brown hair in a bun with an orange bow, wearing a blue t-shirt with a pink piggy bank, is crying with her hands to her face. A boy with a red t-shirt is also crying and has his hand to his mouth. They are both looking worried. A large green speech bubble is behind them.

Will I get infected with  
coronavirus too?

I am scared

A doctor with a beard and glasses, wearing a white lab coat over a red shirt and tie, is smiling and gesturing with his right hand.

Yes, you may get the virus if you don't take precautions. But don't get scared at all because your parents, teachers, helpers, doctors etc. are taking care of you and making sure that this does not happen.

Also, you should help them in ensuring the same by taking proper precautions.

# What are the signs and symptoms of getting sick with coronavirus?

Signs are similar to any flu!

Dry & itchy cough

High Fever

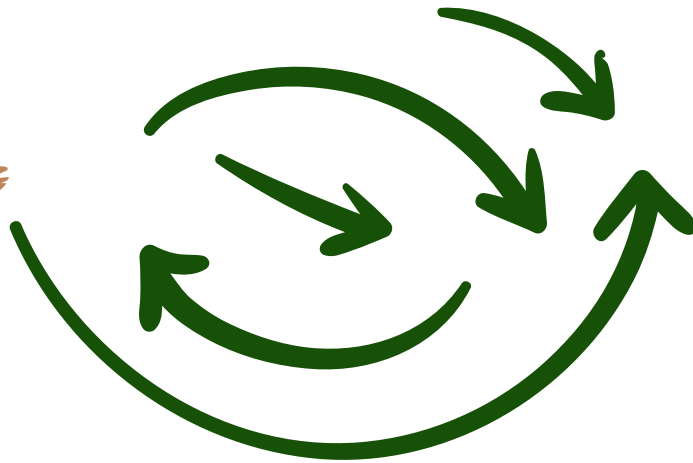

Difficulty in breathing

Sore Throat

# How does the coronavirus travel and pass on to other people?

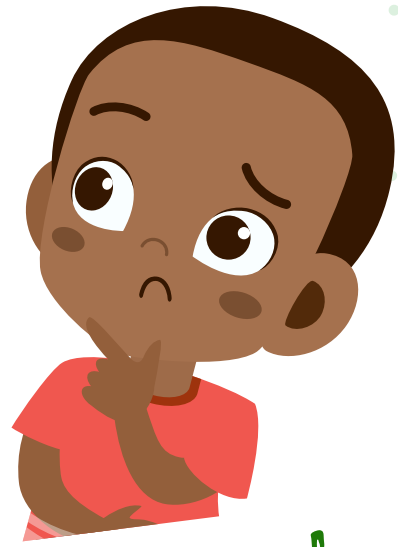

It cannot travel a long distance on its own. Being very tiny and light, the coronavirus germs are present in the droplets of saliva, in the air that someone breathes out, in cough and sneeze as well.

If someone else accidentally breathes in this air, or comes in contact with such droplets of cough, sneeze or saliva while talking, touching etc., they would probably get the illness.

These germs also spread from hand to hand when people greet or touch each other.

Also, these germs can be present on the surfaces such as of the tables, mirrors and any other furniture or objects that someone infected with the virus has touched. These germs can pass onto the next person who touches these objects.

Why are schools, playgrounds,  
shopping malls, shops,  
my daddy-mommy's offices closed?

~~OFFICE~~

CLOSED

~~SCHOOL~~

CLOSED

This virus spreads from one person to another if they are in a crowd or sit, stand close to each other. In schools, offices, malls etc. you can come in close contact by mistake with a person who already carries the coronavirus but he doesn't know about it. Hence all these places are closed currently to stop the spread of the infection.

CLOSED

CLOSED

What precautions should I take so that the coronavirus germs do not enter my body?

There are lots but these are essential for all.

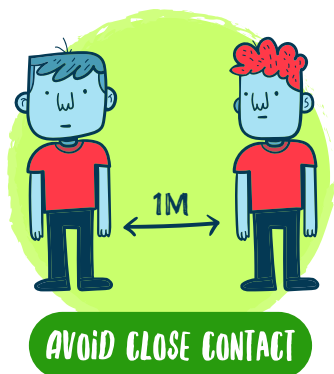

WASH YOUR HANDS

USE HAND SANITIZER

USE MASK

AVOID CLOSE CONTACT

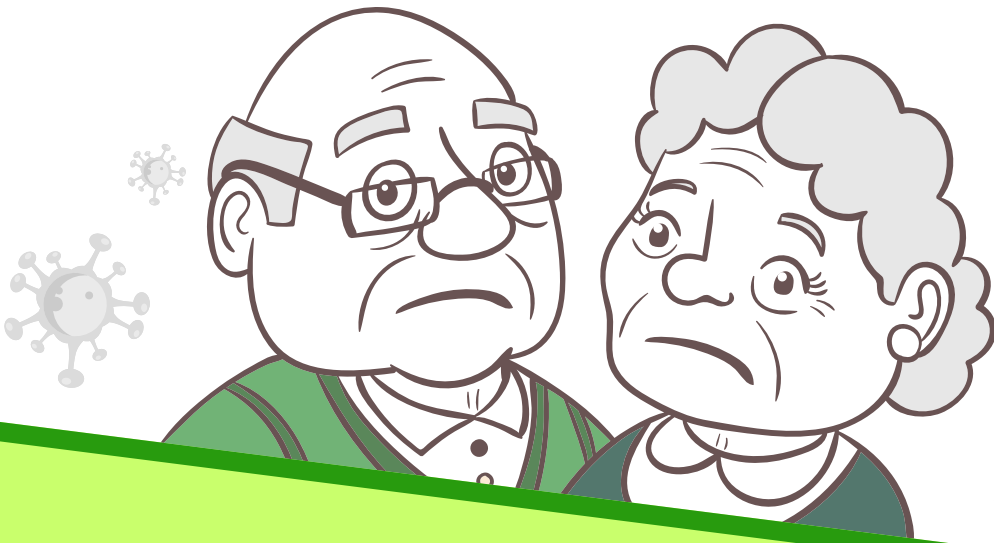

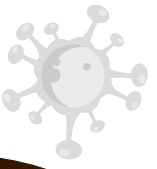

COVER YOUR MOUTH

STAY AT HOME

# Will my grandma and granddad get sick with coronavirus?

Much older people and those who have health problems already, are at more risk of getting sick. But if they stay at home and take good care of their health and we help them to do so, then they surely won't get sick. If they feel they are unwell and have coronavirus, they should immediately call a doctor and get help.

If someone gets sick  
with coronavirus, will  
he/she get alright  
ever?

???

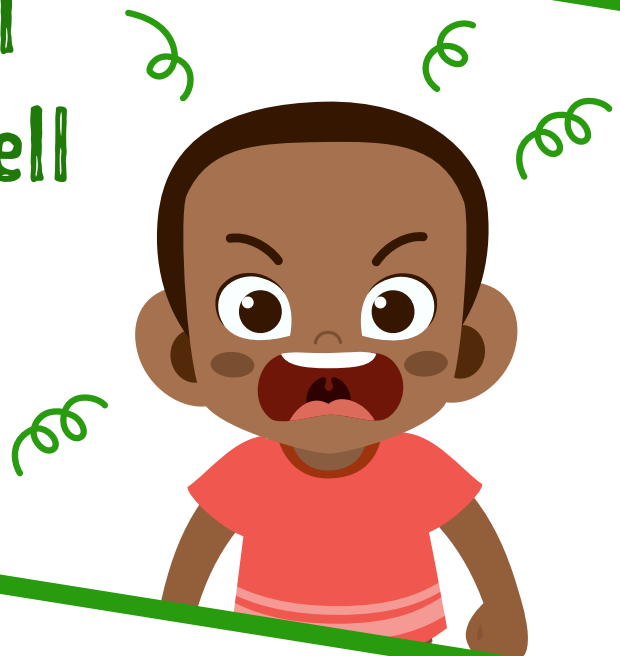

Yes, my dear!  
Most people infected with coronavirus  
completely recover after taking proper  
treatment. They need to follow the  
instructions  
given by us, doctors, strictly to get  
alright.

Will I be able to play  
with my friends again?  
I want to visit various  
places outside as  
before...

I miss my friends, feel  
bored and angry as well  
sitting at home...

Everything will be back to normal soon,  
if you listen to your elders & take proper precautions!!!

You can do everything you want just like before...  
But for now stay at home and keep patience.

I have a some real fun activities for you  
below, to end your boredom.

So do not panic & pray for things to  
quickly get back on track as they were!

THIS IS AN INITIATIVE FROM MECURE HEALTHCARE LIMITED  
TO MAKE CHILDREN AWARE ABOUT COVID-19 PANDEMIC.  
LET'S ALL PRAY AND HOPE THAT THIS ENDS REAL SOON.

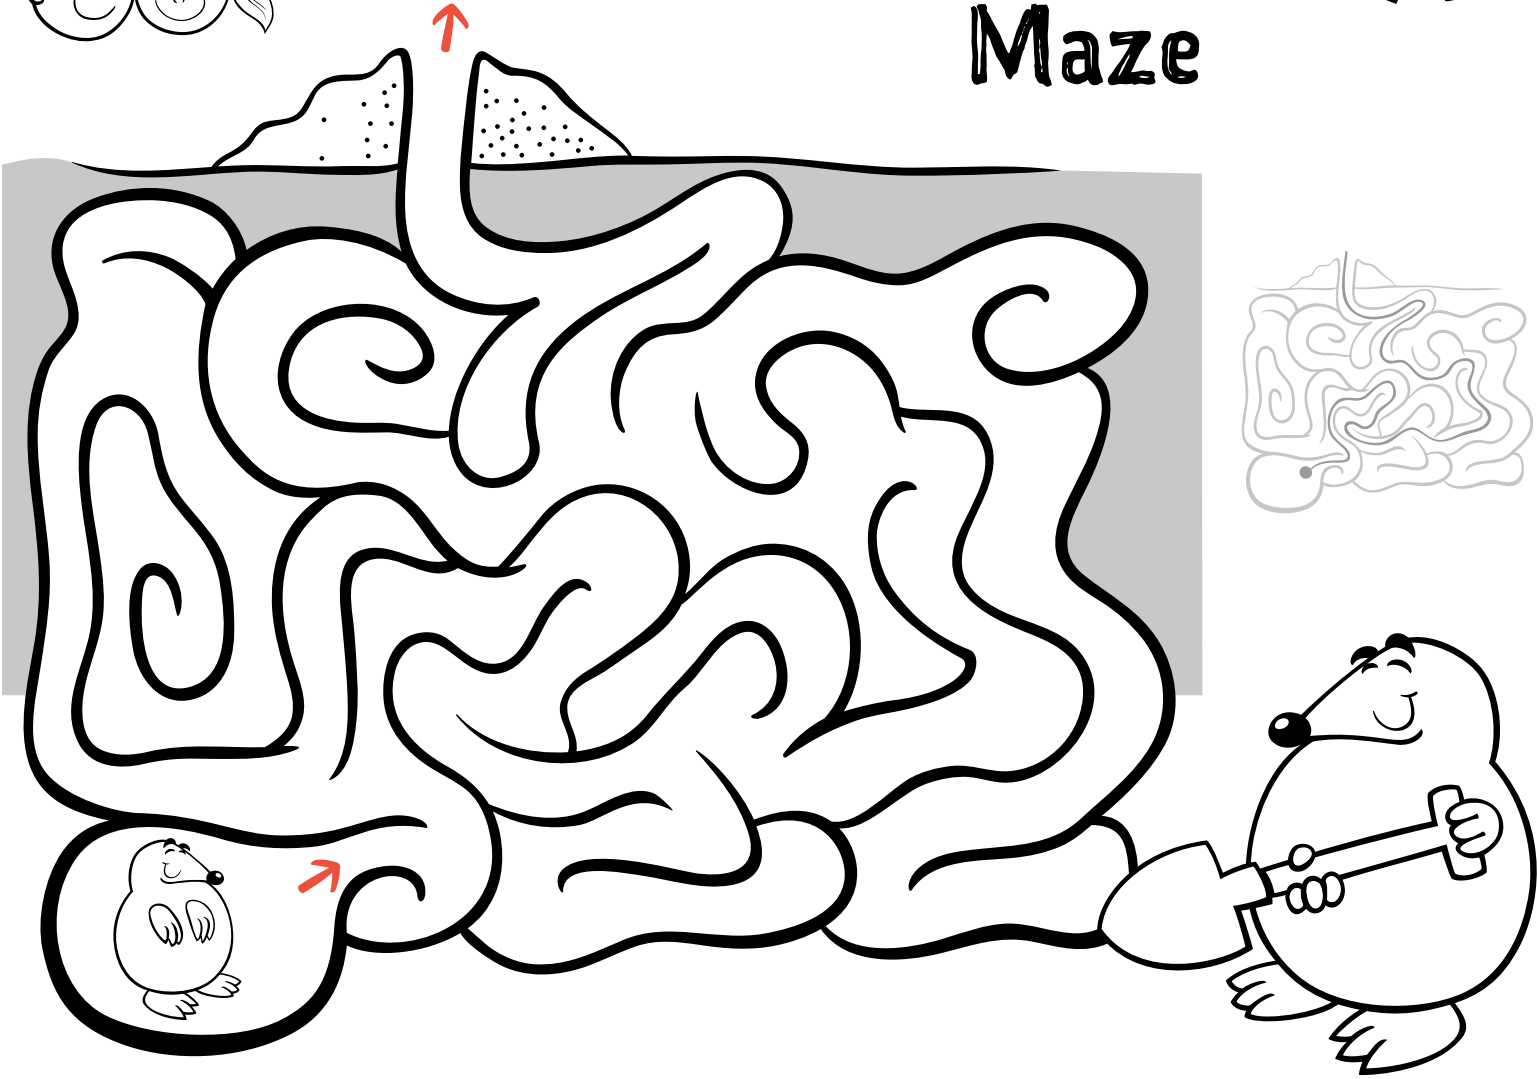

**WE ARE IN THIS TOGETHER!**
